

# Frigidaire

## 13+ SEER ultra high-efficiency heat pump

### Features and Benefits

- Peace of mind warranties
  - 8 years on all parts
  - 10 years on compressor\*\*
- Time/temperature defrost feature offers flexibility to meet any type of climate
- Muffler reduces noise inside and out for efficient, quiet operation
- Copper tube/aluminum fin coils optimize heat transfer and increase durability and reliability
- Permanently lubricated motor delivers long-lasting reliability and quiet operation
- State-of-the-art scroll compressor improves efficiency for economical comfort
- One-piece top designed for maximum airflow and quiet operation
- Energy Star rating maximizes your energy savings — highest SEER rating saves added money
- Durable full-metal jacket protects coils from damage by extreme weather or flying debris
- Guaranteed replacement of entire unit if the compressor fails in first 5 years\*\*

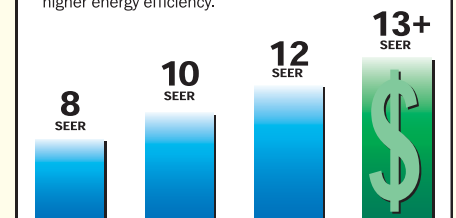

At Frigidaire, we've built our reputation on providing the highest quality products and the best possible service and support. You expect your heat pump to deliver quality, dependability, energy-efficiency, value and comfort. And that's exactly what you'll get from Frigidaire — we're creating a better tomorrow with our products and people.

Why choose a heat pump? Well, in some climates a single heat pump may handle your heating and cooling needs more efficiently than a separate furnace and air conditioner. Ask your Frigidaire dealer to analyze your comfort needs and recommend the best heating and cooling solution for your home.

Your heat pump's efficiency is rated in both Seasonal Energy Efficiency Ratio (SEER) and Heating Seasonal

#### Typical efficiency ratings\*

\*A higher SEER rating represents higher energy efficiency.

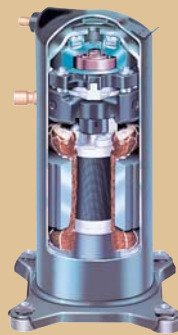

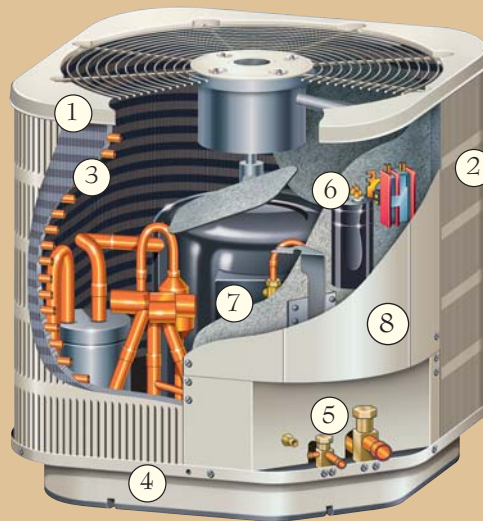

Performance Factor (HSPF). Simply put, SEER measures the unit's cooling efficiency and HSPF measures the unit's heating efficiency. In both cases, the higher the number the more efficient the unit. And, the more money you'll save on utilities.

\*\* Applicable when installed with a matched Frigidaire indoor coil or air handler

# 13+ SEER ultra high-efficiency heat pump

1. **One-piece Top with Drawn Fan Orifice** — Seamless design ensures quiet operation
2. **Durable full-metal jacket** — Protects coil from damage by foreign objects
3. **Single- or Double Row Coils** — Allows easy cleaning with a simple garden hose
4. **Pedestal Base with Built-in Drain Ports** — Protects coil from lawn equipment, reduces vibration and noise, and helps resist corrosion by allowing rainwater and moisture to drain
5. **Service Port** — Reduces service time by allowing easy checking of system pressure during all modes of operation
6. **Compressor Cycle Protection** — Prevents motor damage during momentary power interruptions that may cause unnecessary wear and tear
7. **Muffler** — Reduces noise to ensure a quiet running system
8. **Satin-finished Pre-coat Paint** — Provides durability and scratch resistance

Proven components include Copeland® scroll compressor - Frigidaire's choice for efficiency, durability, and longevity.

## Variable Speed Technology

Optional variable speed air handler available to maximize system efficiencies. Using whisper-quiet variable speed motor technology, the blower improves air quality by mixing air from floor to ceiling to

create more uniform temperatures. Ask your Frigidaire dealer for more details.

- **Fully-Insulated Housing** — Completely insulated for whisper-quiet operation
- **Filter Panel** — Provides easy front access for cleaning the air filter
- **Microprocessor** — Controls the gradual startup and shutdown of the blower for maximum efficiency and quiet operation
- **Satin-finished Pre-coat Paint** — Provides excellent durability and scratch resistance

For more information, call or write your Frigidaire dealer:

Compare our 13+ SEER heat pump to older units. Our 13+ SEER heat pumps exceed the minimum EPA energy efficiency guidelines described in their Energy Star program. Using Energy Star products maximizes your monthly energy savings, comfort and indoor air quality and helps reduce the nation's energy consumption and pollution. Properly sized and installed, you can save 10-40% on heating and cooling bills. Your Frigidaire dealer can give you more information based on your local energy rates.

When a heat pump is truly built to exacting standards of quality and durability, the manufacturer's confidence shows in its warranty. At

Frigidaire, we offer an eight-year warranty on all

**8-YEAR WARRANTY**

**QUALITY PLEDGE**

parts, a ten-year warranty on the compressor and a five-year quality pledge. Extended product protection is available. In addition, your Frigidaire dealer has specific details on warranties, utility rebates and consumer financing programs.

When choosing your heat pump, look not only at the product, but also the service and support provided by your dealer. Frigidaire dealers receive extensive training in the installation and care of your equipment. That means your Frigidaire dealer can help you select the right heat pump for your home and keep it in top operating condition.

So, for home comfort year after year, trust the products and people of Frigidaire — we're creating a better tomorrow for you.
